

Edit Employees(Admin) #User Story

Story #[num]	Admin modifies employee data.
As an	Admin
I want	to edit employee data within the system's database,
So that	I can modify details belonging to registered employees.
Acceptance Criteria	<p>AC 1: Given that I am an admin accessing an employee's 'Edit' page, When I make modifications to their details adhering to input requirements then click the 'Confirm Edits' button, Then the system will update said employee's record and redirect to the employee management page, where the relevant employee record will display the updated data.</p> <p>AC 2: Given that I am an admin accessing an employee's 'Edit' page, When I make any detail modifications to that break input requirements then click the 'Confirm Edits' button, Then the system will highlight all input fields with data breaking requirements, and ask users to change the value to something acceptable.</p>
