

Adjust booking endpoint to get Customer from session not POST

Story# [num]	Adjust Create Booking Endpoint to Check Employee Schedules	Priority	High		
		Effort	1		
As a	Developer,				
I want	To retrieve customer info from session data when creating a booking,				
So that	Bookings are properly assigned to the customer who created them.				
Acceptance criteria	<p>AC 1:</p> <p>Given that a customer is logged in and a valid create booking request form is filled out,</p> <p>When the submit button is clicked,</p> <p>Then the system will successfully create the booking and assign it to the logged in customer.</p> <p>AC 2:</p> <p>Given that a customer isn't logged in and a valid create booking request form is filled out,</p> <p>When the submit button is clicked,</p> <p>Then the system will report that a customer isn't logged</p>
