

SEPT Sprint Planning Notes

Team: WED:6.30PM:05

Sprint: 0

Date: 07/08/2020

Attended:

Scrum Master: Neil Kennedy

Product Owner: Ujj Batra

Development team: Moditha Sulakskshana

Boyan Yao

Micheal Anning

1. Goal

- a) Implement Login and Signup for the users.
- b) Implement 3-5 backend service endpoints.
- c) Write acceptance testing for each user story.
- d) Write unit tests for the implemented backend endpoints.

2. Duration of the sprint

2 weeks

3. What is the team's vision for this sprint?

The items that is required for this sprint will only be moved to the backlog as these tasks are necessary for us to complete the sprint and any other tasks won't be possible to achieve given the pandemic situations and work.

The shippable product at the end of this milestone will have 3-5 backend endpoints implemented and unit tests written for each. The users will also be able to login to the dashboard with validation and signup.

4. Estimation in story points

Task estimation was done on Clickup which is linked in the Github README.md, during a scrum poker session some of the tasks were discussed with each team member and everyone agreed on a given point after discussion with examples and its requirements.
