

Add CircleCI Implementation

Story# [num]	Add CircleCI Implementation	Priority	Medium		
		Effort	5		
As a	Developer,				
I want	To connect CircleCi testing to our Github repository,				
So that	It can automatically test whether our current version is fit for deployment.				
Acceptance criteria	<p>AC 1:</p> <p>Given that all implemented JUnit tests pass in our project's current committed version,</p> <p>When we push our branch to GitHub,</p> <p>Then CircleCi will report that everything works as expected.</p> <p>AC 2:</p> <p>Given that not all implemented JUnit tests,</p> <p>When we commit our current progress & push our branch to GitHub,</p> <p>Then CircleCi will report that our branch can't be deployed, and inform us of the tests that've failed.</p>
